Notes

1. As the Fund has been operating for less than five years, we have used a mix of actual and market index returns for the five-year period to 30 June 2024 to calculate the risk indicator. The risk indicator is based on the market index returns for the 9 months to 31 March 2020 when the Fund was not in existence, and then the actual returns for the 4 years 3 months to 30 June 2024. Therefore, the risk indicator may provide a less reliable indicator of the potential future volatility of the Fund.

Notes

1. The Trust Management – ESG Balanced Fund invests in the Trust Management – Property Fund, the Trust Management – ESG International Share Fund, the Trust Management – ESG International Bond Fund, the Trust Management – ESG NZ Bond Fund and the Trust Management – ESG Australasian Share Fund, all of which are managed by Trust Investments Management Limited.
2. As the Fund has been operating for less than five years, we have used a mix of actual returns and the historical returns data of the Trust Investments – Balanced Fund (*the Balanced GIF*) which was formerly offered under the Trust Investments – Group Investment Funds scheme. The risk indicator is based on the historical return for the Balanced GIF for the 9 months to 31 March 2020 when the Fund was not in existence, and then the actual returns for the 4 years 3 months to 30 June 2024. The Manager reasonably considers use of the historical returns data from the Balanced GIF to calculate (in part) the risk indicator for the Fund the most appropriate way to reflect the potential future volatility of this Fund.
3. For the Trust Management – Property Fund, the Manager has determined that there is no appropriate market index or suitable peer group index for this Fund that reflects the assets of this Fund that would be helpful to investors for assessing movements in the market in relation to the returns of this Fund. As the Trust Management – ESG Balanced Fund (the Balanced Fund) invests approximately 32% of its assets in the Trust Management – Property Fund, the Manager considers that there is no appropriate market index for the non-Property Fund assets of the Balanced Fund that is likely to be useful to investors when assessing the performance of the Balanced Fund as a whole for all relevant periods. Accordingly, the Manager is relying on the exemption in the Financial Markets Conduct (Market Index) Exemption Notice 2024 in relation to the Balanced Fund.

Notes

1. As the Fund has been operating for less than five years, we have used a mix of actual and market index returns for the five-year period to 30 June 2024 to calculate the risk indicator. The risk indicator is based on the market index returns for the 9 months to 31 March 2020 when the Fund was not in existence, and then the actual returns for the 4 years 3 months to 30 June 2024. Therefore, the risk indicator may provide a less reliable indicator of the potential future volatility of the Fund.

Notes

1. As the Fund has been operating for less than five years, we have used a mix of actual returns and the historical returns data of the Trust Investments – Property Fund (the Property GIF) which was formerly offered under the Trust Investments – Group Investment Funds scheme (on 1 April 2020 the Fund acquired all the assets of the Property GIF under a scheme restructure). The risk indicator is based on the historical return for the Property GIF for the 9 months to 31 March 2020 when the Fund was not in existence, and then the actual returns for the 4 years 3 months to 30 June 2024. We reasonably consider use of the historical returns data from the Property GIF to calculate (in part) the risk indicator for the Fund the most appropriate way to reflect the potential future volatility of this Fund.
